PEOPLE ARE THE NEW BOTTOM LINE!

Cost Saving **58%**

Time Saving **96%**

Faster hiring | Better internal staffing | More skilled and engaged employees

FEATURES & BENEFITS

AUTO-SOURCING THE RIGHT CANDIDATES

We analyze JDs according to relevant skills and create an intelligent query to search the connected databases. The top candidates are scored and stack-ranked against the job. And yes, specific business rules can be applied to filter candidates.

INTELLIGENT JOB DESCRIPTIONS

The art of writing Job Descriptions (JDs) is reinvented. We make it easy for recruiters to write technical JDs, by identifying the relevant and irrelevant skills and making it possible to write concise yet complete JDs.

ANALYTICS MADE EASY

Our platform processes both structured and unstructured data from varied data sources. Based on this, it provides analytics and insights on workforce productivity, attrition, impact of training programs on performance, and even identify potential leaders.

FEATURES & BENEFITS

RIGHT SKILL, RIGHT TALENT

We help your talent grow in the organization by helping them acquire the skills that make them eligible for available open positions. Skill-Gap Analysis helps us recommend relevant training programs while ensuring you get top-skilled talent.

SOCIAL CONNECT

We build holistic profiles of candidates using their social network data and build a virtual pool of potential job seekers. Insights into personal and professional interests ensure a culture fitment and help acquire the right talent.

iPARSER

We analyze resumes and automatically capture all data within a few seconds and entered in the appropriate fields. Manual data entry is a thing of the past. Integrate the resume parser with your inbox and the resumes are stored in an organized manner.

jScore is the software which powers HIREalchemy, the platform brought to you by EdGE Networks. jScore performs its magic by using efficient Natural Language Processing algorithms and a powerful skill repository built as an Artificial Neural Network.

EdGE Networks Pvt. Ltd.
9th Floor, The Estate,
#121, Dickenson Road, Bangalore 560042

EdGE Networks Pvt. Ltd. is a leading skill development and technology solutions provider based in Bangalore, India.

By re-engineering Human Resource Management, EdGE Networks connects the right person to the right job, thereby empowering industries and human resources.
